Guidelines for Drug Therapy

- Elevations of total and LDL cholesterol: Statin (TC and LDL decreased up to 50%) Goal based on degree of risk; statin dose increased to maximum as necessary (see below).
- If goal not achieved, the addition of other agents (cholestyramine, niacin, ezetimibe, etc) will need to be determined on a case by case basis as supported by clinical trials, weighing the positions, cost, side-effects, compliance and more.
- Most experts recommend adding additional drugs to max dose statins to lower LDL to goals if necessary.

Are statins safe for diabetics. Statin use in diabetes guidelines. Should all diabetics take statins. Is statin good for diabetics.
